I'm a highly skilled web developer with a passion for creating dynamic and user-friendly websites, with expertise in **HTML, CSS, JavaScript and ReactJS** etc

Projects

Verified Exporters

React, MongoDB, ExpressJS, NodeJS, DeepL, Git, Figma

2024-

- An E-commerce website that connects exporters with importers.
- A User can create account and apply to sell on the website.
- The user can chat with customers.
- The user can manage products and stores.
- The website is being translated to other languages. So user can send message and it will be translated to the desired language of the customer.

Metricks

React, MongoDB, ExpressJS, NodeJS, Git, Figma, MUI

2024-

- A platform where you can create account and add your websites and see their analytics.
- You can also see the performance of the ads on your website.
- A user can also link his meta account to see the performance of ads posted by him on META's platforms.

Sicktweb

HTML, CSS, JavaScript, Github, Git

2023-2023

- Created a front-end web app using HTML, CSS and JS.
- Added a quick description about the working of the website.
- Added custom themes that user can edit using a dashboard.
- Added toggle button to switch between dark and light mode.
- Added a testimonial.
